

**Various positions available to support our development control work
including positions for recent graduates to more senior positions**

Location: Belper, Derbyshire (fully supported homeworking options available for the right candidate)

Full time – flexible working options available

Salary: £17,000 to £34,000, commensurate with skills and experience

Closing Date: 1st April 2019

Looking for a career in maritime archaeology in a growing company with lots of opportunities? Then we would like to hear from you.

MSDS Marine are a Marine and Coastal Contractor specialising in the management, execution and support of archaeological projects in the marine environment. We have a wide range of experience and expertise within the industry from the project management of large scale underwater excavations through to the fulfilment of archaeological licence conditions prior to large infrastructure developments. We provide geophysical and hydrographic services including data collection, processing, visualisation and interpretation.

MSDS Marine are a diving contractor registered with the HSE and provide diving and logistical support to underwater projects both on Surface Supply or SCUBA dependant on requirements. We have experience of providing support to the wider marine sector including ecological assessments, pre and post construction surveys and specialist survey solutions. We are committed to creating hands on experience in the sector for students, volunteers and early career professionals and promoting public engagement with our work.

MSDS Marine have grown steadily since first established in 2011 and are now a market leader in maritime archaeology in the UK. MSDS Marine currently have a large volume of work and are involved in many high profile development projects. As a result, we are looking to expand our team with enthusiastic and self-motivated individuals. Various positions are available and we are particularly keen to hear from people with geophysical experience or an interest and ability to learn. You will be educated to at least degree level with a passion for heritage. A proven track record in commercial archaeology work would be beneficial but is not essential as we have opportunities for recent graduates.

Due to current work levels we have various permanent roles available from opportunities for enthusiastic and motivated archaeologists from early career professionals through to more senior and more specialist roles. Current work includes a range of activities, primarily relating to the planning

process (including EIA work), from research and GIS analysis, to marine geophysical assessment and report writing and provision of advice to clients.

Competitive package of employee benefits available including:

- 100% contribution towards CfA subscription fees;
- Generous holiday entitlement and paid time off to participate in volunteer projects
- Individual training and development opportunities.
